Forecast for Tuesday 09 Jul 2024

Weather: Outbreaks of rain, locally heavy, will gradually clear to the north this morning. However, it will leave a lot of low cloud, with patchy light rain and drizzle throughout the day. However, there will be some drier interludes, although it will remain rather cloudy. Feeling humid too.

Chance of cloud-free hill tops above 600m: 30% for much of the day.

Low cloud and visibility: Widespread low cloud down to 300-400m. Breaking up briefly into the afternoon, rising to around 600m, though confidence in detail remains low. Cloud lowering again into the evening. Generally poor visibilities, especially during the morning with outbreaks of heavy rain. Improving once this clears but likely moderate at best at scenic viewpoints of the park.
